Vellore, India

A Certified Front End Developer, an inquisitive learner with an optimistic approach to problem solving and learning new things. Good collaborative and interpersonal skills; dynamic team player with well-developed written and verbal communication abilities and accustomed to performing in deadline-driven environments.

## SKILLS

Languages: JavaScript, Java, C, TypeScript, HTML5, CSS3

Frameworks: Reactjs, Tailwindcss, SASS

DB & Tools: Nodejs, Redux, MongoDB, Firebase, Git, Figma

Platforms: Linux, Windows

## EXPERIENCE

### Internship:

#### Front end web developer (Company: Pirates Corp)

DEC 2022 – JUL 2023

- Contributed extensively to the development of the Fitknock web app, an innovative project at Pirates Corp.
- Designed, developed and implemented robust user account creation and management features for the Fitknock web app, including Registration Form Modules, Access Provisioning Interfaces, Identity Management Interfaces and Membership Signup Pages.
- Developed these features that allowed users to create an account, log in and sign up for a Membership on the app. Utilized technologies such as Reactjs, SASS, TypeScript and React Router.

### Freelance:

#### Full stack developer (Client: Vi-Fi Capitals)

SEP 2022 – NOV 2022

- Designed, developed and launched vifi capitals official website, showcasing their products and services. Built a fully functional blog site, allowing users to browse and read articles.
- Designed and implemented content management functionality and an intuitive admin dashboard, enabling the admin to write and publish blog posts and manage content seamlessly.
- Collaborated with the client, understood their requirements and delivered solutions that aligned with their vision.
- Ensured the website and blog site were responsive and optimized for a seamless user experience across different devices.
- Utilized technologies such as HTML, CSS, JavaScript, Reactjs, Tailwindcss, MongoDB, and Firebase to create efficient and scalable solutions.
- Provided ongoing maintenance and support, addressing any technical issues and implementing necessary updates.
